

Admin - Framework v0.1

Platform	Browser
Author	Garry Richardson

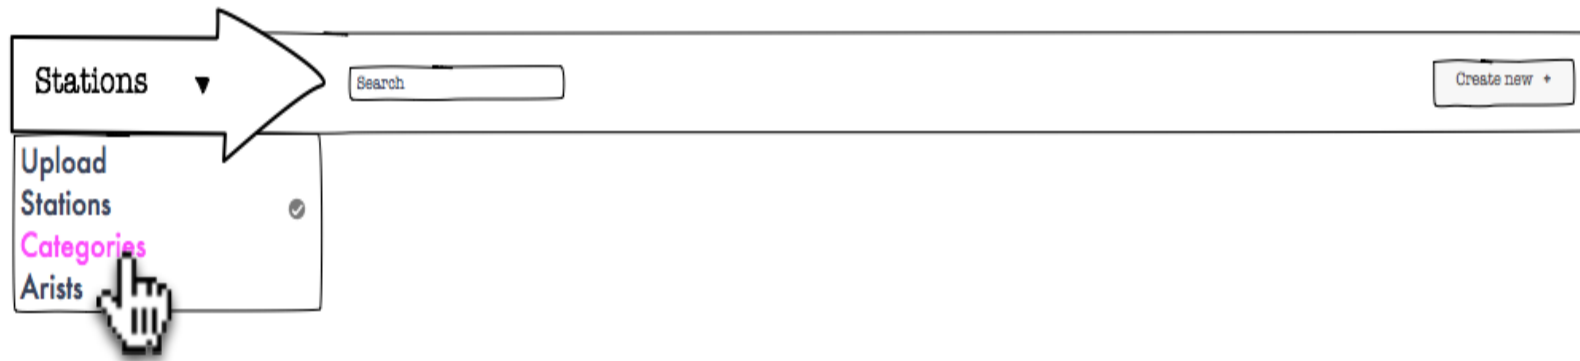

Change Log:

Version	By	Date	Notes
0.1	Garry Richardson	12th March 2013	Draft

Switching between sections

The first time a user come to the admin section they should land in the stations section.

They can switch to other sections by clicking anywhere on the section title container, which shows a dropdown menu (this is on every page)

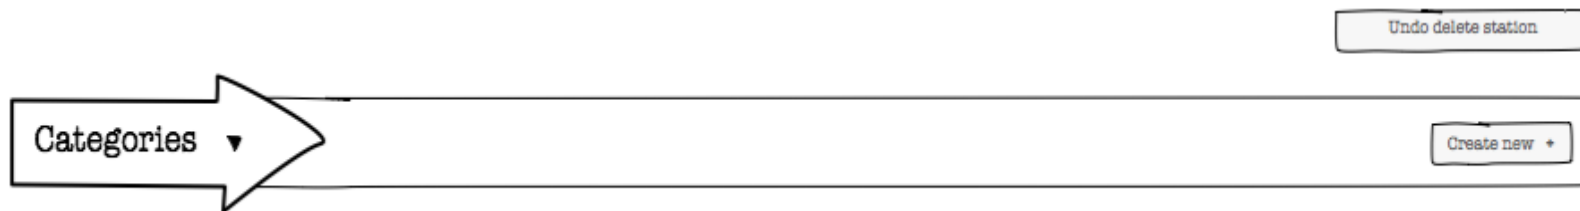

A cookie should be used to ensure the use the user always returns to the last section that they viewed.

Sections defined in admin sitemap.

Undo previous step

Each time a major action is performed and undo button appears in the top right hand corner.

These actions include actions such as delete and are specified in the spec for each section

Once clicked, the “undone” the button disappears.

Deleted items in lists are greyed out

If an item is deleted, it does not instantly disappear, bit remains in the list in a greyed out state until the user leaves the page:

3			Lorim Ipsum	1.23	Lorim Ipsum	Missing				
4			Lorim Ipsum	1.23	Lorim Ipsum	Dollar				
5			Lorim Ipsum	1.23	Lorim Ipsum	Dollar
