## View subcategories annotations

1. Filter by name.
  - a. As the user types the list shows playlist that start with each letter typed, for example 'Po' would show all categories that start with 'Po', such as 'Pop' & 'Power' etc
2. Order a- z or z - a
3. Add/remove to a main category drop down.
  - a. The tick shows it is added.
  - b. Click again to remove (un-tick)
  - c. The drop down stays open until the user mouses out.

- d.
4. Click row to edit
5. Choose number of results (10, 25, 50, 100)
  - a. *This is a low priority feature, and only included because it appears on other pagination throughout the admin interface.*
6. Pagination

## Create a new category annotations

1. Breadcrumb back to view tabs
2. Stations tab for station ordering the top 6 stations in the category.
  - Note that stations are not created or edited on this screen.
3. Name
  - Character limit to be agreed by Georgina Stone
4. Type
  - sub by default
5. Visible
  - checked by default
6. Image (with preview)
7. Sub categories / Add to main category
  - Title/purpose changes when station type is amended (main or sub)
    - i. Retain previously set categories
  - Categories are added like tags (see station spec).
  - Drag to order as a list - example
    - i. <http://jqueryui.com/sortable/>
8. Create this category
  - The category must have a name and an image (main only) in order to be created, if the user has not selected these then they are highlighted in red.
  - Once the category has been created:
    - i. the screen changes to the edit screen
    - ii. auto save is enabled

< ! > A main category must have at least 6 stations

No longer need this category

Delete this category

## Edit category annotations

1. Breadcrumb include category name and ID
2. Auto save message
  - Status
    - i. Published
    - ii. Unpublished
3. Show/Hide category
  - Disabled if the station has less than six stations
    - i. HTML Title text should read “A category must have at least 6 stations to go live”
    - ii. A category is not shown on the shown on the site if it has less than 6 stations
4. Categories can't go live until they have 6 stations in them.
  - Message stays there until that criteria has been met.
5. Delete category (ensure undo option is included - see stations spec)

## Manage stations in category annotations

1. Search for and add a station (only admin user generated stations).
  - This should be an ajax style text match search.
2. List of stations in the category, drag and drop to order top 6
  - Anything ordering after 6 does not apply to site
  - Drag to order the list - example
    - i. <http://jqueryui.com/sortable/>
3. Station grid preview
  - Static
  - Updates as item is dropped

## Undo UI

## Annotations

1. Undo option displayed when user removes or overwrites stations from the grid or list
  - a. Examples of undo options
    - i. Undo remove station from grid
    - ii. Undo remove station from category
    - iii. Undo move station to grid
    - iv. Undo overwrite station on grid
