Landing page annotations

1. Visible or hidden
    - Some stations visibility can be postponed
2. Click anywhere on the row to view the station info, where you can make & edit changes.
    - To indicate this, the row changes colour on hover
3. Each column can be sorted A-Z/Z-A (like iTunes).
4. Filter by station name
5. Create new (links to station info)
    - This creates a new station instantly named "Unnamed station #date stamp#"
6. Increase results per page.
    - 20 results default ,with options to extend to 100 or 200 per page.
7. Generic paging

Create/view stations annotations

Admin users get to this page via 'Create new' or clicking on a station search results.

1. Breadcrumbs allow the user to navigate back to the search results.
   - If there is no station name, then user the text 'Unnamed station #date stamp#'.
   - This should be updated as soon as a station name is added.
2. Last saved message
   - All changes are auto saved
   - Updated each time this happens
3. Name
   - Maximum character = 100 including spaces
4. Description
   - Maximum character = 170 (including spaces, but NOT markup)
   - If a description is not added, then an auto description is generated, containing artists from the station.
     i. Example "Featuring music by #artist name#, #artist name#, #artist name#, #artist name#
5. Link
6. Link text
   - Appended to the end of the description on Now playing page only
7. Order options
   - Randomise (default)
   - Ordered, then seeded from artists
   - Ordered then repeated
8. Available from
   - Some generic jQuery plug in would be fine
   - Delays visibility of station
9. Station ID (non editable)
10. Influenceable allows the station to be influenced by loves and hates.
    - The Searchable, Randomise and Influenceable check boxes are ticked by default.

11. Station type options (required)
- Playlist (default)
- Artist
- Album
- Song
- Genre

12. Categories
- Stations can be assigned to up to 5 categories (number set to avoid repetition).
    - **i.** This might cause issues, so is a low priority feature
- Categories are added by keyword search. Note how Parent and subcategories are shown.
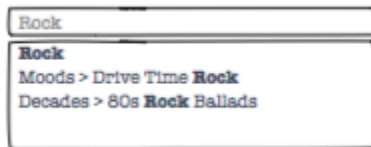

13. Link to Stations allow users to link to other stations to this station, which become related on the "Now playing" page**.**
- Here users can search for stations created by admin users only.

14. Badge refers to labels that can be put on station artwork on the choose page.
- These are all manually set
- Options
    - **i.** None (default)
    - **ii.** New
    - **iii.** Exclusive
    - **iv.** Updated

15. Add/Change artwork
- This opens a standard browser file upload window.
- Old artwork is simply overwritten

16. Delete station
- An undo option is shown when a station is deleted -

- This will be covered in the framework spec, but is also noted in the category spec.
- Text = "Undo delete station"

Station track listing

Station track listing annotations

This screen allows the admin users to view, reorder, and delete station content. This content should not be paginated.

All playlist creation is done on the current subscription site. We may decide to bring this functionality over at a later date.

1. Filter by track
2. Columns (not sortable, cos that would be daft)
3. Drag to reorder
4. Play track
   - Play icon can toggle between play & pause
     i. http://stackoverflow.com/questions/2988050/html5-audio-player-jquery-toggle-click-play-pause
5. Number of tracks in station
6. Delete track
